ELTRON SLM

 **technology**

Greater reliability

Higher machine productivity

More opportunities

Rapid job change

JQS Eltron SLM

The Eltron SLM is the optimal retrofit solution to increase quality and productivity for all quilting machines of leading manufacturers.

Your benefits with Eltron SLM

- **Greater reliability:** Eltron SLM replaces mechanical cam mechanisms and failure-susceptible or damaged electronic machine controls/hydraulic systems with up-to-date servo drives.
- **Higher machine productivity:** Increased by 30 % if the machine is in good mechanical condition. Optimal in connection with a machine retrofit.
- **More Opportunities:** With the user friendly CAD software **Q-CAD** new designs can be created or changed easily and quickly. 250 designs are already preloaded, new designs will be provided on our website.
- **Rapid job change** by using electronic pattern programs instead of using pattern cams.
- **Easy operation** via touch screen
- **Improvement of quilting quality** by precise servo drives.
- **Service and spare parts:** Eltron SLM utilizes the same components as the current Saurer machine models, therefore the supply of spare parts is ensured for the long run.

Installation and Commissioning

Service technicians certified by JQS install and commission Eltron SLM. Through professional handling and a time spending mechanic concept downtimes are kept at a minimum during the retrofitting of the machine. Normally the retrofitting is accomplished within 2 days. Immediate and full operation of the machine is guaranteed after completing the retrofitting process.
